

Earth and It's Resources

Science Choice Board

Describe how a delta is formed. Include an illustration of each step.

Diagram weathering, erosion, and deposition as they would apply to a glacier.

Write lyrics to a short song to explain how a canyon is formed.

Diagram and summarize a before and after scene from an area where a volcano erupted and changed the land.

Write a poem as an ode to soil properties. An ode is written to praise or glorify something.

Diagram an outside park and label 5 alternative energy resources found in your park.

Create, color, and label symbols to represent each of these 5 resources: biofuels, hydroelectric, wind, solar, and geothermal.

Diagram examples of wind erosion, water erosion, gravity erosion and ice erosion and landforms they may be a part of creating.

Diagram and summarize the formation of fossil fuels in 3 steps.
